

Vinyl Laminated Nylon Runway Closure Markers

Compliance and Applications

FAA Compliant: AC 150/5340-1L

Our closure markers are made of durable vinyl laminated nylon and provide airports with a reliable and economical method for closing runways and taxiways to aircraft use. A special process is used that weaves high tenacity polyethylene tapes into fabric, then laminates the material on both sides. The solid yellow color provides superior visibility for a clear indication of closures.

Features

- Poly tarps are heavy duty (1,000 denier), weather resistant and tear resistant.
- Tarps feature heat-sealed seams, grommets, and reinforced edging with strong poly rope inside hem on all sides.
- UV stabilizers on both tapes and lamination ensure longer life of tarp.

Ordering Codes

Part Number	Description
Y10X60	10' x 60' Runway Closure Marker Tarp
Y5X30	5' x 30' Taxiway Closure Marker Tarp

* Note: Order two tarps to complete an "X" pattern.
