Portable Heliport Lighting System HL-PHLS

Applications

The Flight Light Inc. Portable Heliport Lighting System (HL-PHLS) provides perimeter lighting for semi-permanent, temporary or emergency helipad touchdown and lift-off zones (TLOF).

PHLS Package 1 - Solar LED

Package 1 features solar powered AV70 lights. These green, omni-directional, LED, elevated lights are completely self-contained and can be installed in minutes and require minimal maintenance.

This package also includes a Solar Series portable internally lighted wind cone. Being 100% solar powered, installation is incredibly fast - no need for trenching, cabling, or electrical services. A long life, low power LED floodlight and patented maintenance-free swivel help reduce airfield down time. The Solar Series wind cone includes a portable all-aluminum tripod that can be set up quickly. ICAO compliant.

- No trenching required, easily deployed.
- 100% solar powered, integrated solar/battery.
- Long life, low maintenance.
- Automatic night activation.
- ICAO compliant.

Included:

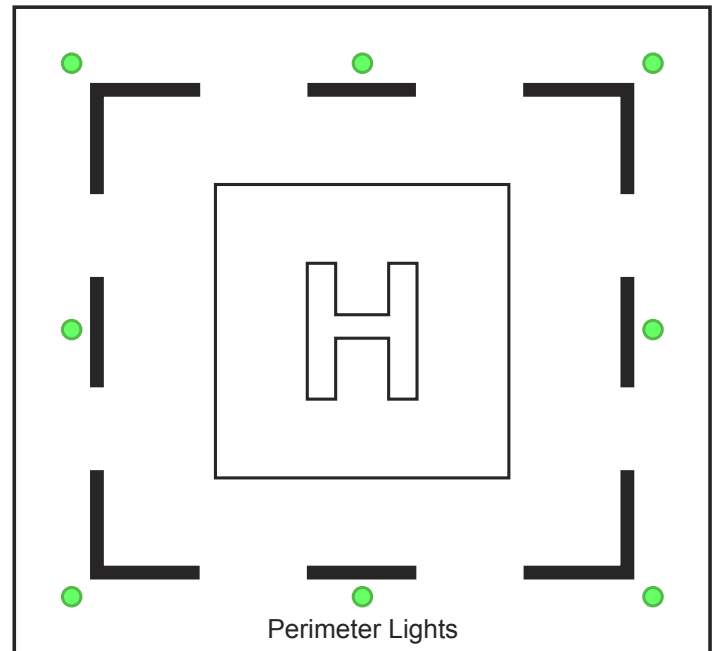

- [8] AV70 Solar Aviation Lights (green) with Ground Stake Mounts
- [1] Solar Series Portable Wind Cone: Size 1 (18" diameter x 6' long) wind sock, solar LED AV70 red obstruction light
