HL-280 LED or Halogen Heliport Taxiway Centerline Inset Light

Compliances

- ICAO Annex 14
- CAA CAP168
- NATO STANAG 3316
- BS3224 Part 5 inset fittings

Application

Inset green lights are used to define heliport taxiway centerlines. Taxiways allow for the movement of helicopters from one part of a landing facility to another.

Why Our HL-280 is Better

- Body casting manufactured from aluminum alloy for lightness, strength and durability.
- Corrosion resistant anodized finish.
- Available in 12-24 VDC or 120 VAC versions.
- Pressurized light cavity keeps moisture out and reduces the frequency of replacement.
- Prism removal and replacement achieved without the need for adhesive or sealants.
- Pre-focused optics to simplify maintenance procedures.
- A window blank is available for unidirectional applications.

Specifications

- Low profile: .39 in. (10mm) projection.
- Light channel within .2" (5mm) of grade.
- Stress bearing: 11 tons dynamic load and 22 tons static load.
- Color variations achieved by using color specific filters.
- Corrosion resistant anodized finish meets U.S. Military Standard Salt Fog Test (MIL-STD-810E, Method 509.3) and IEC EN 60068-2-11 (Test Kb, severity 3).
- Stainless steel fasteners.
- Net weight 6.6 lb. (3kg). Gross weight 7.7 lb. (3.5kg). Carton size 9 in. x 9 in. x 5.7 in. (230mm x 230mm x 146mm)

LED Version

- Energy saving LEDs consume only 7W per fixture.
- Long life LEDs (average rated life of 10 years) reduces frequency of replacement.
- Color variations achieved by using color specific LEDs.

Ordering Codes

Fixture	Color/Color*	Lamps
HL-280	G: Green (std)	50: 50W, 120V
	W: White	52: 50W, 240V
	R: Red	LP: 120V/240V LED
	Y: Yellow	LV: 12V LED
	X: Blank	LVD: Dimming 12V LED

Color/Color

HL-280			
--------	--	--	--

* Green is currently the recommended output color for heliport taxiway centerline lights.
